

THREE RIVERS SWCD

December Newsletter - Issue 8

Message from Grace:

Hi teachers! I hope you have had a great first semester of the school year. As things wind down, please keep in mind that I am available for anything and everything for the Spring semester! I am looking forward to the possibilities of partnership, and if you need anything in the meantime, please don't hesitate to reach out! Happy Holidays!

Resources:

- [Teaching Students about Winter Ecology - NEEF](#)
- [Cornell Live Bird Camera in NY](#)
- Create a Nature Journal: Although Winter may seem bleak, there are so many different things to explore outside! Create nature journals with your students and observe birds, mammals, and plants that are active in the cold months!

What I Can Bring to the Classroom:

- Enviroscape: hands-on watershed model that demonstrates the affects of water pollution
- Soil Tent: interactive tent that covers VA's regions, soil layers, septic tanks, and the water cycle
- SOL Capsules: lesson kits that are catered to specific SOLs for grades K-6
- Lessons: unique environmental education lessons from Project WET, Project WILD and Aquatic WILD, and Project Learning Tree.

Resources:

If you have any interest in programming or resources, reach out to me!
